

Visit Bangladesh

An Android App

Course: Software Project Lab II (SE 505)

<i>Supervised By</i> Sumon Ahmed Assistant Professor	<i>Submitted by</i> S.M. Shahriyar (BSSE 0902) Sudip Kumar Sah (BSSE 1040)
Project Description: The project is about to reduce effort to search famous tourist places and find the route for visiting Bangladesh. The project has various tourist places division-wise of Bangladesh. As well as, the route by (air/road) to reach selected destined places. The project is android based and aims at the development of the Tourism Sector of Bangladesh. The project has additional features like tourist guide info, rating and reviews of respective places helps to choose out best places. When people have to visit Bangladesh, they can collect detailed information about respective places and formal road routes along with air-way to reach destinations. Also, people can add new places and details about places if they visit any new places.
